SUMMARY

Cybersecurity Analyst with 2+ years of experience in SOC operations, incident response, vulnerability management, and cloud security. Combines SIEM and endpoint investigations with AI/LLM security research focused on adversarial attacks and data leakage. Master's graduate in Cybersecurity Management, available for full-time cybersecurity roles.

PROFESSIONAL EXPERIENCE

San Diego State University | Cybersecurity Researcher

San Diego, CA | Sep 2026 - Present

- Developed a token-embedding protection framework to address frequency-analysis exposure in AI/LLM systems, informed by adversarial AI testing and security risk assessments.
- Designed adaptive token-randomization mechanisms to investigate defenses against man-in-the-middle (MITM) attacks during model training and inference.
- Built security validation frameworks to evaluate protection controls against model extraction, inference attacks, and sensitive data leakage, and recommended mitigation controls.

Kaar Technologies | Cybersecurity Analyst

Chennai, India | Mar 2022 - Jun 2024

- Helped increase patch compliance from 65% to 97% within one year through Nessus vulnerability assessments, risk-based vulnerability management, and patch management coordination with infrastructure teams across endpoints, servers, and cloud environments.
- Improved ticket-resolution efficiency by 35% while managing security incidents, vulnerabilities, and change requests in ServiceNow, maintaining accurate documentation and stakeholder communication.
- Performed security monitoring and alert triage using Splunk Enterprise Security and Microsoft Sentinel SIEM platforms; investigated suspicious logins, privilege escalations, and anomalous activity to support threat detection, escalation, and incident response.
- Conducted endpoint security investigations using Microsoft Defender for Endpoint and Microsoft Defender XDR, correlating logs and indicators for root cause analysis, incident scoping, and containment decisions.
- Investigated AWS cloud security events through CloudTrail and CloudWatch log analysis, identifying unauthorized Identity and Access Management (IAM) activity, security group changes, and privileged API calls for escalation and remediation.
- Performed network traffic analysis and packet analysis using Wireshark, firewall logs, DNS records, and TCP/IP data to investigate suspicious connections, identify indicators of compromise, and support containment and network troubleshooting.
- Conducted security baseline and compliance assessments aligned with the NIST Cybersecurity Framework (NIST CSF/RMF), NIST SP 800-53, and ISO 27001; partnered with system administrators to address configuration gaps and implement hardening controls.
- Assessed web applications for OWASP Top 10 vulnerabilities using Burp Suite, documented security findings, and recommended remediation to improve application security.
- Delivered security awareness training on phishing, password security, privileged access, and secure computing practices to reinforce organizational security policies.

PROJECTS

SOC Detection and Threat Hunting Lab | GitHub

- Built a Splunk SOC lab simulating brute-force attacks, PowerShell abuse, and malware activity. Developed SPL detection rules, MITRE ATT&CK-mapped alerts, and interactive dashboards to support threat hunting and incident analysis.

AWS Password Management Server | GitHub

- Built a credential management solution using AWS Secrets Manager for centralized secret storage, with CloudTrail and CloudWatch integrations for access monitoring and automated alerts on unauthorized access attempts.

TECHNICAL SKILLS

Security Operations and Governance: SIEM Alert Investigation (Splunk), Threat Hunting, MITRE ATT&CK, SOAR, Playbooks, Data Loss Prevention (DLP), Business Email Compromise (BEC), Adversary-in-the-Middle (AiTM) Phishing, Active Directory, Wazuh, ELK Stack, Nmap, Audit Support, Third-Party Risk Management, HIPAA, GDPR.

Cloud and Network Security: AWS EC2, VPC, VPN, Route 53, Secrets Manager; DHCP, VLANs, Network Segmentation, Routing and Switching, OSPF, BGP, EIGRP, NAT, IDS/IPS, FortiGate Firewall Policies, Cisco Routers and Switches.

AI Security: PyTorch, LLM, Hugging Face Transformers, MITRE, OWASP Top 10, GenAI Security, AI-Assisted Analysis, Workflow Automation, AI Output Validation

Operating Systems and Automation: Windows Server, Linux, Python, PowerShell, Bash, SQL, JavaScript, Git, REST APIs.

EDUCATION

Master's in Cybersecurity Management

San Diego State University | San Diego, CA | Aug 2024 - May 2026

GPA: 3.74/4.00

Bachelor's in Computer Science and Engineering

Anna University | India | Aug 2018 - May 2022

GPA: 3.41/4.00
